Examiner's Statement of Reasons for Allowance

6. As Applicants pointed out in the Remarks, the prior art of record (the SafePatch Manual) do not disclose and/or fairly suggest at least claimed limitations in independent claim 1 “...performing a first step wherein a network-connected-computer list which holds, for all computers connected to a given network, information for identifying each computer, and a software-property management list... performing a second step wherein there is created a list of computer omitted in the software-property management based on the computer extracted that is present in said network- connected-computer list and absent in said software-property management list in the first step, ...a list of computer in unused state based on the computer extracted that is present in said software-property management list and absent in said network-connected-computer list” and similarly recited in such manners in other independent claims 3, 5, 6, 10 and 11 (Remarks, pp. 11-17).

These claimed limitations are not present in the prior art of record and would not have been obvious, thus all pending claims are allowed.
